Trovira CRM – Starter Plan Full Web CRM Layout

Tech Stack:

Part	Technology
Frontend	React + Vite + TypeScript
Backend	Node.js + Express
Cloud	Hostinger
Database	Supabase PostgreSQL
ORM	Prisma

You are building two systems:

1. **Trovira Admin Panel (Super Admin – Your Company)**
2. **Trovira CRM Panel (Starter Plan – Client CRM)**

I will show full layout in text for both.

PART 1 — TROVIRA ADMIN PANEL (SUPER ADMIN)

Admin Panel Layout

```
┌──────────────────────────────────────────────────────────────────────────────────────────────────────────────────────────┐
│ TROVIRA ADMIN | Search | Notifications | Admin Profile                                                                  │
├──────────────────┬──────────────────────────────────────────────────────────────────────────────────────────────────────┤
│ SIDEBAR          │ MAIN CONTENT                                                                                          │
│                  │                                                                                                       │
│ Dashboard        │                                                                                                       │
│ Clients          │                                                                                                       │
│ Subscriptions    │                                                                                                       │
│ Plans            │                                                                                                       │
│ Payments         │                                                                                                       │
│ Support          │                                                                                                       │
│ Settings         │                                                                                                       │
│ Logout           │                                                                                                       │
└──────────────────┴──────────────────────────────────────────────────────────────────────────────────────────────────────┘
```
